

DAN PRATER

Dan Prater's Biography

I was born and raised in and around the suburbs of Detroit, Michigan with my older brother Steve. I grew up in the heart of the automotive industry surrounded by muscle cars, motorcycles and various other motorsports where I learned the nature of mechanics at a young age. While growing up, I recall having other interests outside of the black and white world we lived in, such as the occult, psychics and tarot cards. I also remember playing various games with friends using intuition as our guide.

After I graduated from high school and realized the importance of furthering my education, I decided to join the U.S. Navy at which time I was able to complete an Associate's Degree in Automotive Technology. I became a Master Automotive Technician as well as completed my undergraduate degree in the automotive field from a local university. Having worked as a master technician for over 10 years I was fortunate enough to have the opportunity to become a Professor at a local college specializing in automotive related courses.

My first experience with Dowsing was around the year 1999 on a Biodynamic farm in Ypsilanti with Master Dowser Harvey Lisle (1916-2009). That day on the farm I was introduced to energy line creation/transformation and collaborative work with nature spirits for the health of bee hives, as well as water dowsing. Having experienced a Dowsing response that day I decided to join ASD and support the truth I knew in my heart. I didn't quite have the time and devotion around that time in my life but I remained a dedicated silent member of American Society of Dowsters over the years.

Over the next few exciting yet exhausting years I earned my semi-professional motorcycle road racing license while competing across the country on my 1000cc sport bike at various road racing courses. Having pushed myself to the edge of my physical limitations I found clarity within my mind and body. This clarity led full circle back to Dowsing and spirituality.

After several years of racing I traded my time at the race track for a more spiritual journey and started attending the ASD conferences and networking within the Dowsing community.

When I realized the closest Dowsing chapter was from four to six hours away, I realized I needed to start something locally that others could benefit from as well. Shortly thereafter I started my own Dowsing chapter in Southeast Michigan (www.dowers.us) with the help of my lovely wife, my brother Steve and other local Dowers.

We have had some great adventures since its inception in 2010. We have helped drought stricken land owners find water where drillers said there was none, created labyrinths with flowing energy, helped pet owners locate lost pets, assisted in the location of a downed aircraft in the Gulf of Mexico, and located distant relatives in France. It has all been in the name of Dowsing Fun and Love.

After watching all of the chaos and natural disasters occurring around the globe, I started to feel like I have more to give the world than just working, racing and paying my taxes. I wanted to make a difference in people's lives. I wanted to contribute to humanity in ways that give people hope and a reason to breathe every day. I wrote a letter to Steve Herbert after seeing the devastation in Haiti and I was ready to do what I could for this and other causes here and around the globe. I have been fortunate enough to have been given the opportunity to serve the Water For Humanity Fund® and contribute my time and efforts. Thank you for the opportunity to serve the Fund and the American Society of Dowers.
